## Asendle Game Management Software [www.asendle.com](http://www.asendle.com)

### ASENDLE GAME MANAGEMENT SOFTWARE OFFERS THE FOLLOWING FEATURES:

- Web based - will run on any operating system with a web browser (e.g. Windows, Apple iPad & iPhone, Tablets with Android OS)
- Supports data exchange with an Agrident APR500 hand-held device. Relevant data can be captured electronically in the field and uploaded into Asendle. This function will eliminate common mistakes that happen during traditional data capturing methods.
- Asendle will constantly be developed with additional features (plans to upgrade every 6 months) which will be made available to all registered users.
- Powerful search function to find animals per registration number, name, 2 different VID's or up to 5 different EID's
- Animals can be flexibly grouped either by Breed/ Sub breed or Group/Camp/Herd
- Easy import of contact details (vets, breeders, buyers, sellers) via CSV files. CSV files can be generated by all major email programs such as Outlook and Thunderbird as well as exported from web services like gmail.com, yahoo.com and hotmail.com
- Convenient payment via Paypal (and Credit Card)
- Performance measurements, family tree and medical treatments are visually displayed in an easy-to-read format through simplified graphs.
- Provision is made for creating automated activity sheets and reports with the option to save, print or export these to Dropbox on daily, weekly or monthly intervals.
- Data can be printed and/or emailed to potential buyers
