

SHEEP MASTER COUNTER

- Simple Operation
- Mobile and light frame for portability
- Counts livestock individually using RFID
- Identifies livestock which were not counted
- Keep track of animals in groups

PRODUCT DESCRIPTION

The Sheep Master Counter is specifically designed to be portable in order to count livestock at various locations.

The RFID Counter App, which is an Android app, connects to the Sheep Master Counter via bluetooth and enables the collection of the EID (Electronic Identification) numbers of the animals. The App allows registration of animals in different groups and counting can be done for specific groups to see which animal in the group is not present at counting. In other words, a specific roll call.

SYSTEM COMPONENTS:

- Counter Frame
- RFID antenna
- RFID reader with Bluetooth
- 12VDC Battery (not included)
- Android Device (not included)
